

KYRIBA FACT SHEET

Treasury Management For Private Equity Firms

Kyriba brings innovative technology and experience in helping well-known private equity and alternative asset managers automate global cash and payment management workflows.

Current Challenges for Private Equity Firms

- **Cash Positioning & Forecasting** — Many private equity (PE) firms have insufficient systems and workflows to optimize cash and liquidity. This lack of global oversight across the management company and within individual funds minimizes cash visibility and renders effective forecasting impossible.
- **Unique & Complex Accounting** — PE firms often rely on disparate accounting processes for the management company at both the investor level and the fund level. Accounting systems are often disconnected from bank platforms, which complicates accounting automation.
- **Excess Banking Fees** — It is very common for PE firms to feature a large number of diverse banking relationships across their investment portfolio. Typically there are too many accounts and bank services, leading to excess banking costs.
- **Ineffective Payment Controls** — Acquired organizations can bring manual and inconsistent payment controls and processes. This creates inefficiency and increases operational risk.

Many private equity (PE) firms have insufficient systems and workflows to optimize cash and liquidity.

Kyriba ROI by the Numbers

 **4,914**

Hours per month of global productivity gained

 **\$3.6M**

Total savings over a five-year period

 **4.1**

Kyriba delivers global oversight of cash across funds, driving 100 percent cash visibility and reliable cash forecasts.

How Kyriba Can Help

Kyriba empowers private equity firms to optimize cash and liquidity, reduce operational risk within funds, and increase the effectiveness of cost reduction initiatives. Kyriba's secure, highly scalable cloud infrastructure can help in a number of key areas:

Gain Control of Cash

Kyriba delivers global oversight of cash across funds, driving 100 percent cash visibility and reliable cash forecasts. Kyriba helps optimize deployment of cash and liquidity, improving investment returns and speeding payback of entity borrowing.

Simplify Cash Accounting

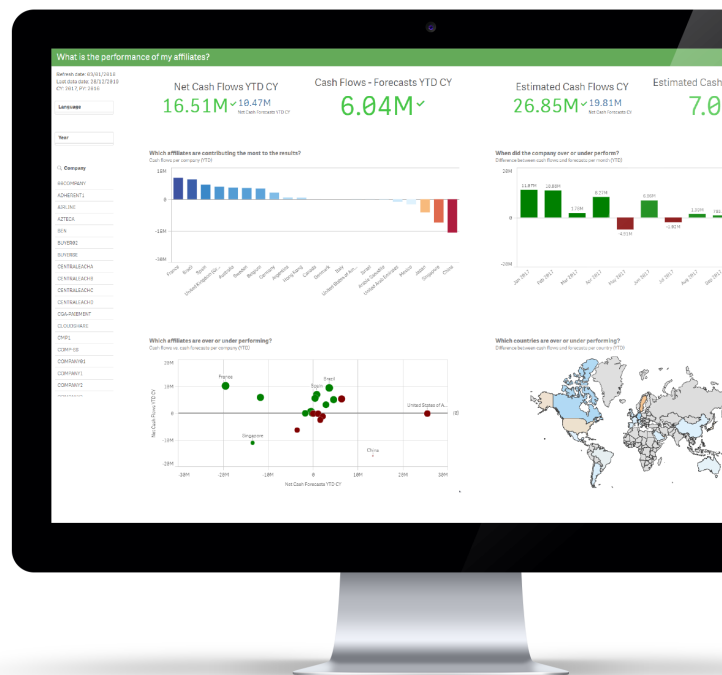

Kyriba automates cash and fund level accounting, simplifying generation of journal entries while introducing structured audit and controls to the accounting process. This saves immense hours and offers a single source of record for accounting inquiry.

Reduce Risk of Payment Fraud

Kyriba offers centralized and standardized payment controls across the entire enterprise, aligning payment policies with a digitized payment workflow. Kyriba's multi-channel payment platform also offers internal and external screening to ensure authorized payments are efficiently delivered.

Reduce Banking Costs

Kyriba perfects visibility and control of bank accounts to identify opportunities for bank account rationalization. Kyriba's bank fee analysis will further support cost reduction initiatives by analyzing accuracy of bank fees and comparability across banks.

About Kyriba

Kyriba is the global leader in cloud financial management solutions that enable forward-thinking treasury and finance teams to optimize cash and risk management, payments and working capital strategies. Kyriba delivers a highly secure 100% SaaS platform, superior bank connectivity and a seamlessly integrated solution set for tackling many of today's most complex financial challenges. With Kyriba, global organizations can streamline key processes, enhance fraud protection and compliance, and drive more growth opportunities through improved decision support and forecasting. Kyriba is the trusted partner for thousands of leading companies, including many of the world's largest organizations. Kyriba is headquartered in New York, with offices in San Diego, Paris, London, Tokyo, Dubai and other locations. For more information, visit www.kyriba.com.
